1. In the city of Cernavoda there are a large number of workers, including for the most part UTM workmen employed on the Danube-Black Sea canal construction. The security forces are numerous and active. There are many officers and enlisted men in khaki uniforms with open collared jackets, long trousers, high boots or heavy shoes, Soviet type caps with black visors, green epaulettes and armed with Bereta pistols.
2. The Militia is very alert and suspicious because of the canal construction and the antiaircraft installations around the port. Their uniforms are light blue with open collars for the officers and light blue caps with dark blue bands.
3. Antiaircraft artillery is installed at both ends of the port of Cernavoda. Guns are set up in casemates which are mounted on either side of the Danube River and are covered up with reeds. One of these casemates is located about 40 meters from the Danube on the left bank very close to the first bridge pier. The mouths of the guns are visible. A dozen casemates are divided in this way on both sides of the bridge and are patrolled by militia groups composed of three soldiers each.
